Professional Experience

Community Banker, Provident Bank

Jan 2026 – Present

- Process customer transactions with strict accuracy and compliance to documentation and regulatory standards, handling cash and account records daily.
- Coordinate office purchasing by completing request forms and comparison-sourcing vendors for the best price on select goods.
- Identify and escalate account or transaction issues to the appropriate team members, maintaining clear communication across departments.
- Use Microsoft Word, Excel, and Outlook daily for documentation, reporting, and coworker correspondence.

Peer Leader, Learning and Tutoring Services

CSU San Marcos, Apr 2023 – May 2025

- Communicated complex material clearly to diverse audiences with accuracy and professionalism in one-on-one and group settings.
- Tracked student progress and session outcomes, identifying recurring issues and adjusting instruction accordingly.
- Handled sensitive academic information in compliance with university confidentiality standards.

Private Tutor (Independent)

2019 – 2025

- Sourced and managed a private client base independently throughout high school and college, handling scheduling, invoicing, and client communication.
- Adapted instruction and materials to individual student needs across a range of subjects.

Education

California State University San Marcos, San Marcos, CA

Bachelor of Science in Mathematics

Graduated May 2025

Relevant Coursework: Financial Mathematics, Graph Theory, Machine Learning in Finance, Optimization, Stochastic Processes, Data Structures and Algorithms

Projects and Research

Student Researcher, Radical Cubic Extensions Research

CSU San Marcos, May 2024 – Aug 2024

- Prepared and filed weekly progress reports for review and presentation to research staff.
- Validated and reconciled results across research methods to ensure consistency and accuracy.
- Presented findings via research poster; co-authored paper currently in preparation for publication credit.

Brownian Motion & First-Exit Time Modeling

Senior Seminar Project

- Performed exploratory and scenario-based analysis using Python simulations, validating outputs and reconciling results across multiple scenarios for accuracy.
- Developed a research poster with data visualizations, communicating technical findings to both technical and general audiences.

Wolfram Award – Technical Integration in Mathematics

CSU San Marcos

- Recognized for integrating computational tools (Python, SageMath) into coursework to improve analytical clarity and reproducibility.

Skills

- **Software:** Microsoft Excel, Word, Outlook, Python, R, LaTeX
- **Core Strengths:** Data accuracy and verification, documentation and compliance, fast learner across new systems and processes, clear technical communication
